授業の目標 (Course Objectives)

For businesses, understanding how the central banks work is thought to be very essential, because of its direct and indirect effect on the companies. Here, and from a business manager-viewpoint, we try to study in depth about the role of the central banks, their balance sheets, and their effects on the business environment.

授業の内容 (Course Contents)

The first part of this course explains the case of Japan, in terms of the business environment and effects on it through the policies taken by the Bank of Japan.

The second part discusses the role of the central bank, its balance sheet, and how the central banks can manoeuvre to manage the business environment even during times of turbulence. And based on this understanding, how managers can make their business strategies to cope with these policies of central banks.
