授業の目標 (Course Objectives)

The objective of this course is to introduce students to the basics of family law from a comparative perspective.

授業の内容 (Course Contents)

We begin the course with the meaning of comparative family law, family and marriage. We then explore the rules and practice of family law from a comparative perspective. In the last classes we study controversial cases of family law relating to same-sex marriage, common-law marriage and infidelity. We use the Socratic Method to investigate real and hypothetical cases so students will be asked questions every class.
