授業の目標 (Course Objectives)

Students learn the role of cities and its geographical/economic development within historic and modern contexts. The course material is focused on Tokyo's historical development since the seventeenth century from architectural, economic and cultural aspects. Students are expected to extend the perspective to other contemporary cities in various cultures.

授業の内容 (Course Contents)

The class discussion builds on reading materials including the designated textbook and listed readings, students also have opportunities to present their experience and research on a city of their choice (both Japanese and foreign cities are accepted), in front of the class and share their thoughts.

The course is offered online and designed to have both regular Rikkyo students and special international students (incoming exchange students from partner universities). Not only they learn about the role of cities and its historical development, but it is also expected that they have a plenty of opportunity to study together through class discussion. Students are expected not to fear to read English materials, have class discussions, and present their works (including the final report) in English. Some course materials, including the textbook, are also available in Japanese (listed at the bottom of the readings).

For students who are physically present in Tokyo, optional on-site field trips to explore some neighborhoods and historically important sites will be offered to complement the knowledge they learn from books and lectures.

授業計画 (Course Schedule)

1. Introduction: Please prepare to share your favorite city and the reason briefly with the class.
2. Topography, roads, and land use
3. Historic social groups and lots for residences
4. Water, transportation and market activities 1
5. Water, transportation and market activities 2
6. Water, transportation and market activities 3
7. Guest lecture and discussion 1
8. Development of the modern city
9. Urbanism, modernism and the city form
10. Guest lecture and discussion 2
11. Student presentations 1
12. Student presentations 2
13. Student presentations 3
14. Student presentations 4

授業時間外(予習・復習等)の学習 (Study Required Outside of Class)

Students are required to read class materials before each class and prepare for class discussions. It is strongly encouraged that students bring their own experience and knowledge from outside readings to the class to enrich the knowledge obtained from the textbook.

成績評価方法・基準 (Evaluation)

最終レポート(Final Report)(40%)/Class Presentation(30%)/Class Participation(30%)
