授業の目標 (Course Objectives)

The purpose of this course is to deepen your understanding of Saitama's nature, culture and society focusing on Satoyama landscape based on environmental humanities.

授業の内容 (Course Contents)

This course consists of reading, researching, writing and presenting papers by students as well as lectures by the lecturer. The lectures include general observations of Saitama based on historical, geographic, sociological and cultural studies in several districts during a particular period from prehistoric times to the modern period. The course particularly focuses on Satoyama in Saitama based on a theoretical framework of environmental humanities. Students are required to proceed own research about Satoyama in Saitama and give a 5-10 minute presentation every time.
